INTRODUCTION

INTRODUCTION

GENERAL COMMENTS

This publication is the second in an annual series presenting statistics on Alberta's manufacturing industry. The basis for the statistics collected was an annual Census of Manufactures survey conducted jointly by Statistics Canada and the Alberta Bureau of Statistics for 1974.

The main feature of the publication is the provision of principal manufacturing statistics to the most disaggregated level of industrial detail possible at the province, census division and urban municipality levels. A supplementary set of tables providing principal manufacturing statistics by the industrial activities of agricultural processing; petrochemicals; metals and equipment; forestry products; non-metallic mineral products; and, manufacturing industries, n.e.s., respectively, is also included.

The principal tabulations presented in this publication are listed below:

Section 1: Principal Manufacturing Statistics by Industry, Alberta, 1974

Tables present principal statistics by industry group and industry for Alberta.

Section 2: Principal Manufacturing Statistics by Industry, Major Centres, Alberta, 1974

Tables present principal statistics by industry group and industry for Calgary, Edmonton(proper), Edmonton(metro), Lethbridge, Medicine Hat and Area, and Red Deer.

Section 3: Principal Manufacturing Statistics by Industry Group, Census Divisions, Alberta, 1974

Tables present principal statistics by industry group for Census Divisions in Alberta. More detailed breakdowns of the data for these areas are not available.

Section 4: Principal Manufacturing Statistics, Selected Centres by Census Division, Alberta, 1974

Tables provide principal statistics for selected centres in Alberta. The data relate only to the total manufacturing activity taking place in the centres listed.

Section 5: Principal Manufacturing Statistics, Type of Industrial Activity by Component Industries, Alberta, 1974

Statistical tables show the manufacturing component of the industrial activities of agricultural processing; petrochemicals; metals and equipment; forestry products; non-metallic mineral products; and n.e.s. manufacturing industries.

HIGHLIGHTS

The purpose of this section is to summarize the statistics presented in this publication and to show the relative importance of manufacturing to the Alberta economy.

The following tables present:

- a) Statistics showing the contribution of Alberta's manufacturing industry to total value added of goods producing industries, employed labour force and gross domestic product of Alberta (Tables I, II and III, respectively).
- b) Total value of manufacturers' shipments by industry groups for 1974 with a comparison of their respective industry share in 1973, (Table IV).
- c) Total value of manufacturers' shipments by five Alberta cities, (Table V).

(r) - Revised.

NOTE: Value added is equal to gross receipts minus the value of goods and services purchased from other industries.

Goods-producing industries include: agriculture, forestry, fisheries, trapping, mining, electric power, manufacturing, and construction.

1974 ^(p)	11,663,000	1,053,000	9.0

(p)- Preliminary.
NOTE: Gross Domestic Product (GDP) at Factor Cost is a measure of the value of goods and services produced by the economy over a particular period. It does not include such non-factor costs of production as capital consumption costs (depreciation) and indirect taxes net of subsidies - costs which enter into the market price of goods and services. For a complete description of this concept, refer to the publication sourced below.
